Community Newsletter

October 2026 | News, programs, activities and community connections

Welcome to October!
Fall is here, and this month is packed with ways to learn, connect and have fun. From beginner-friendly computer help to seasonal crafts and our Halloween Social, there is something for everyone.

This Month at a Glance

Oct. 20	**Computer Basics - 1:30 PM** A relaxed, beginner-friendly session covering everyday computer skills.
Oct. 27	**Pumpkin Craft - 10:00 AM** Create a seasonal fall project and enjoy time with friends.
Oct. 30	**Halloween Social - 11:00 AM** Join us for a festive celebration. Costumes are welcome!

Technology Corner

Tip of the Month: Strong Passwords

Use a different password for important accounts. Longer passphrases are easier to remember and harder to guess. When available, turn on multi-factor authentication for an extra layer of protection.

Need a little help?

Our technology sessions are designed for beginners. Bring your questions about email, websites, smartphones, or basic computer use.

Community Notes

Monthly Menu

The October meal menu is available on the website. Members can view it online or download a copy to keep at home.

Calendar Updates

Check the online calendar for the latest activities, classes and special events. Monthly information can be updated without rebuilding the website.

Featured Program: Computer Basics

Technology should feel useful, not intimidating. This month's Computer Basics session focuses on practical skills: using a web browser, recognizing safe links, organizing files, and asking good questions when something goes wrong. No prior experience is required.

"Learning something new is easier when we do it together."

Looking Ahead

November will bring new activities, updated meal information and another monthly newsletter. The goal of this demonstration site is to show how a community organization can keep important information current without needing to redesign the website every month.
